Key benefits of Elring gaskets and gasket sets:

- No vehicle-specific research required
- Exact match of Elring gaskets and gasket sets for vehicle and automatic transmission
- Gasket set includes all necessary gaskets and seals for repair job
- Time savings thanks to the provision of details on all required gaskets/seals
- All gaskets and parts supplied by gasket specialist in OEM quality

Our gaskets and gasket sets for the professional repair of automatic transmissions offer genuine advantages. What is more, you can look forward to full technical support via our free service hotline.

 **821.530**

 **821.540**

 **821.460**

 **447.310**

Elring has added user-friendly gaskets and gasket sets to its range of products, specially designed for the repair of automatic transmissions. These new gaskets and gasket sets cover a range of different transmission designs from major vehicle manufacturers. This is your chance to extend your scope of service and save valuable time. Each gaskets and gasket sets includes everything needed for professional sealing in the field of automatic transmission repair, e.g.:

- Oil pan gaskets
- Oil stem seals
- O-rings
- Retaining rings
- Special rubber components
- Gaskets/seals for the transmission control unit

The demands placed on modern automatic transmissions are enormous. High mileages, significant speeds, and multiple gear changes soon add up, causing gradual wear and tear when it comes to key components. This often results in long-term damage to the system. The following aspects may help you to identify serious issues at an early stage and avoid expensive damage to the transmission:

- The automatic transmission slips during gear changes
- The automatic transmission no longer produces forward momentum
- There is a distinct delay when shifting into drive
- The automatic transmission oil is discolored and smells burnt
- There are unusual sounds such as whining, clunking, or grinding
